

Kenneth John B. Bolilan

Full-Stack Web Developer

About Me

Experienced Full Stack Developer with a deep background in architecting scalable web solutions and managing complex data ecosystems. Expert in Node.js, with specialized proficiency in optimizing MySQL and MS SQL databases for high-performance production systems. Beyond technical implementation, I bring a proven history of leading agile development cycles and migrating large-scale datasets. I am passionate about high-quality software that solves organizational challenges through clean, and robust data integrity.
